EDUCATION

Scaler School of business

2025-2027 | **3.54 CGPA**

B.Tech Electrical and Electronics Engineering

- Vellore Institute of Technology, Vellore, Tamil Nadu, India

2018-2022 | **9.07 CGPA**

Class 12 CBSE – Gyan Ganga International Academy, Bhopal, Madhya Pradesh, India

2018 | **82.00%**

Class 10 CBSE – Saint Joseph's Convent Idgah hill, Bhopal, Madhya Pradesh, India

2016 | **10.00 CGPA**

SKILLS

- **Technology Stack** – Salesforce Development, Salesforce fundamental, Salesforce Data model, Salesforce Lightning, Data Management
- **Programming Languages** – Apex, Lightning web component, SOQL, SOSL, Aura component, VLSI Verilog coding, Matlab Simulink and Arduino.

INTERNSHIP

Industrial Trainee – Andritz Hydro private Limited

June 2020

- Worked in designing the poles and testing of various components used in synchronous generator.
- Presented a report on the manufacturing process and workflow of synchronous generator.

Internship – Maulana Azad National Institute of Technology (MANIT), Bhopal

Dec 2020

- Designed and implemented Digital Circuits using Verilog code using Vivado software.

Live Project – Intent Farm performance marketing agency, Bengaluru

Jan 2026 - Present

- Done Market research for brands and provided growth recommendations

WORK EXPERIENCE

ACCENTURE India Private Limited - Advance Application Engineer Analyst

July 2022 – Aug 2024

Experienced Salesforce Developer at Lash Fusion, specializing in configuration, customization, and resolving 101 errors in test classes. Transitioned to INITIENT from April 2023, actively contributing to Salesforce Development by swiftly addressing defects in both customization and configuration. Accomplished in fixing over 50+ test classes across orgs. Proficient in creating data setups, Lightning Web Components, apex classes, and custom fields. Consistently involved in modifying and enhancing Apex classes and triggers. Adept at collaborating on various aspects of Salesforce development and customization. Build Salesforce GenAI asset encompasses Data cloud build, Service voice cloud built, Einstein LLM/ Prompt Template and Einstein Conservation Insight.

PROJECTS

2 Am Buddy – N8N AI Agent

Dec 2025

- Built an AI-powered voice support agent using n8n automation, designed to provide a safe, judgment-free conversational space for users experiencing stress, loneliness, or anxiety.
- Designed the AI interaction workflow and conversational logic, enabling empathetic real-time responses and 24/7 accessible emotional support through a prototype voice interface.

Split Happens – Replit AI Vibe coded App

Oct 2025

- Built a smart expense-splitting web/mobile prototype that uses OCR-based receipt scanning and item categorization to automatically calculate fair cost sharing among group members.
- Designed the product workflow and user experience (Upload → Smart Split → Share & Settle) enabling transparent bill tracking, category-based splits, and payment reminders for group expenses.

Mitti-Mitra – GitHub (Community-based Prototype)

2024

- Coded a social-impact prototype through Vibe Coding, enabling community collaboration for sustainability.
- Focused on user research, data flow management, and collaborative feature integration.

Link: <https://github.com/ak-na-ja/Mitti-Mitra.git>

Lovable App – Vibe Coding (Full-stack Product Build)

2024

- Created an interactive app using Vibe Coding on the Lovable platform for real-time user engagement.
- Demonstrated product thinking, UI design, and deployment skills in a low-code environment

Link: [ink:https://srajan-akshaya-vibe.lovable.app\](https://srajan-akshaya-vibe.lovable.app)

INITIENT

April 2023 – Aug 2024

- Actively involved in Salesforce Development with configuration and customization.
- Solved defects in adequate duration of time whether defects being a part of customization or configuration.
- Fixed in total 30+ test classes in ALEXION and INITIENT orgs
- Created Data setup, Lightning Web Components, apex classes, custom labels, and fields.
- Modified Apex classes and triggers.
- Build Salesforce GenAI asset encompasses Data cloud build, Service voice cloud built, Einstein LLM/ Prompt Template and Einstein Conservation Insight.

Lash Fusion

Jan 2023 - April 2023

- Hands on experienced on Salesforce Development with configuration and customization.
- Created Field, Validation rule and Lookup filters.
- Modified page layouts, validation rules, Apex classes, and triggers.
- Fixed test classes majorly 101 error.

Smart Helmet

Dec 2021 – May 2022

- A working prototype of a Smart Helmet for miners, construction and industrial workers and bike riders, fulfilling all the solutions to avoid fatal accidents in various domain such as mine construction

Voice controlled car

Dec 2019

- Designed and developed a car with the use of Bluetooth module which could be controlled using an application. The application used google voice API to convert speech to text and send the commands to the microcontroller via Bluetooth.

Video control using hand gesture

Oct 2020

- The project aimed at controlling the VLC media player (audio and seek) using hand gesture which were detected by ultrasound sensor and Arduino.
-

CERTIFICATIONS

- Secured 2nd position in Spark Tank D2C challenge
 - Secured 3rd position in Case competition at SIMB
 - Secured 5th position in Case competition at MDI
 - Salesforce Certified Data Cloud Consultant (March 2024)
 - Life Science Certificate (Jan 2024)
 - Salesforce Certified Platform App Builder (Nov 2023)
 - Salesforce Certified Platform Developer I (July 2023)
 - Salesforce Certified Administrator (March 2023)
-

PUBLICATION

- **Design of Static Low Power Flip Flop using Logic Structure Minimization Techniques** **Sept 2021**
I co-authored a paper which was published by the Institution of Electronics and Telecommunication Engineers (IETE). The paper presents a novel low-power D flip-flop design that employs a hybrid logic structure to optimize transistor count and improve performance. Simulation results in 90 nm CMOS technology demonstrate reduced power consumption and faster slave state transitions compared to conventional designs.
-

POSITIONS OF RESPONSIBILITY

Project Head | IEEE – Signal Processing Society (2019)

- Taught basic fundamentals of MATLAB Simulink to 100+ students during a session.
- Taught basic fundamentals of Pspice to 80+ students during a session.
- Conducted an online technical project session for 20+ students for a month.

Organizer | Science fair outreach in orphanage (2019)

- Led 5 groups of students to create project on various domains.
- The event witnessed over 50+ children of 3 centers of an orphanage.

Coordinator | IBM DEV workshop, Explore the GITHUB, Imagify and Self-driving car. (2018)

- Supervised the operation of 4 different technical events, happening in the technical festival, Gravitas'19.

Student Coordinator | ICNAN'19 International conference (2019)

- Supervised the operation of events happening in the technical conference.
